## EDUCATION

### AVICHI HR.SEC SCHOOL

#### State board

2020 - 2022  
(68.67%)

### MEENAKSHI COLLEGE

#### Deemed university

2022 - 2024 (Completed 2 years)  
BCA Degree (Bachelor of Computer Applications)

## SKILLS

- HTML
- CSS
- Java Script
- My SQL(Basic)
- python(Basic)
- React JS
- Bootstrap
- Git & Github
- Firebase
- MongoDB
- ExpressJS (Basic)
- NodeJS (Basic)

## OTHER SKILLS

- Canva
- Netlify
- Git hub
- Problem Solving

## About Me

I completed my 12th at Avichi Higher Secondary School and a two-year BCA degree at Meenakshi Academy of Higher Education. I recently completed my training at Freshworks Software Academy, where I improved my technical and problem-solving skills.

I enjoy building projects from scratch, which led me to create a personal portfolio, an OTT website, and a music streaming app. I'm passionate about the MERN stack and have hands-on experience with HTML, CSS, JavaScript, React JS, and currently learning Node.js and Express.js.

## PROJECTS

### Music-app

Chordify is a responsive music streaming web app built using React JS. It offers smooth audio playback, artist and music director details, and a personal song library. Firebase handles authentication, Firestore manages real-time data, and Storage securely hosts music files. This project strengthened my skills in React, Firebase integration, and front-end development.

### OTT - Platform

- HTML , CSS , JAVA SCRIPT
- FIREBASE FOR DATABASE AND AUTHENTICATION
- NETLIFY

My OTT website, CiniMini, offers seamless media streaming and user interaction. It has a responsive and interactive UI for a smooth experience. Firebase ensures secure authentication and real-time data management, while Cloudinary handles media storage and delivery. This project enhanced my front-end skills by using modern web technologies and optimizing performance for better usability.
